urban greening conseqs
                         real time decision making
                which data are useful
                                              what stakeholders need
                     scale of dynamics
                                             from science to operation
                               preparedness
                                                 improve modelling
            scale of control
                                                                         control dynamics
                               data quality
                                                diversity into models
                                                                       biting behaviour
                              modelling comparison
modelling parameters scal
                                             learn from others
                                                                    data quality and sharing
                              microclimate
      more questions
                                                           share data models
                                          how to control
   practical applications
                                        how to risk assessment
                                                                     urban heat effect
                                   can we predict well
                                                         project proposal
    scale of observation
                                            model refinement
                                                                      overwintering dynamics
              from ento to epi models
                                           data needed by models
                                                                       improving in using data
                              early warning systems
                                 type of model outputs
                                                          stakeholder needs
                                          operational public needs
                           learning new approaches
```
